#wheelnext channel on  
<https://discord.gg/pypa>

<https://github.com/wheelnext>

# During this event

- Share your own goals, pain points, and ideas
  - In the Index Priority or Wheel Variant workshop: discuss and capture ideas, requirements, constraints, ...
  - Find out how you can help design & development after this event is over - prototypes, PEPs, working out use cases & user stories, and more
- 
- 

## After this event

- Share news about WheelNext with others
  - Help review or improve PEP drafts and other content
  - Test current prototypes on your own use cases
  - For packaging tool authors:  
ensure you're happy with the design and impact of it!
  - For package authors:  
please ensure that your use case is captured
  - Join the monthly community meetings (announcements will be sent to the Google Group (<https://contribute.wheelnext.dev/>))
- 
- 

## After this event

Participate in Python packaging community discussions on Discourse for the PEPs you care about.

<https://discuss.python.org/c/packaging/>

***If you only can do one thing, please do this.***

# Jumping onto a moving train

I have  $N$  weeks/months of engineering time to invest - where do I start?

Let's build  
something great !

...

**Thank you for your attention**
